

Wallplate HDMI over CAT5 45M

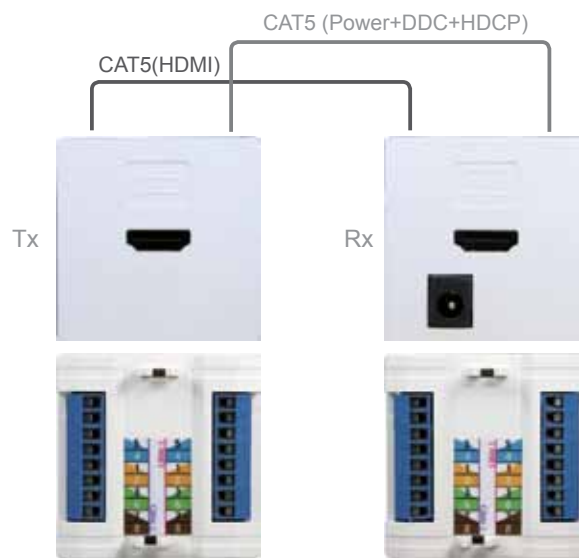

SHM-MG255

Rextron wall-mount HDMI Extender consists of a Transmitter and a Receiver. IT allows you to extend HDMI signal up to 45 meters away from a Video source by using UTP CAT5 / 5e / 6 cable, and helps to increase the space efficiency. It supports most of the popular Windows, Mac operating system.

Besides, the intelligent EDID Copy function on the Transmitter (Local Unit) enables the best video presentation, and the Auto EQ adjustment feature on the Receiver (Remote Unit) allows spontaneously adjusting video quality according to the length of CAT5 cable.

There is no software or interface card to install. Simply connect the cables, power up the system and you are ready to extend HDMI image to a monitor with excellent clarity. It is economical and scalable design for personal or home office use.
